## SYNOPSIS

With over 14 years of experience as an experienced and results-driven Land Surveyor, I am skilled at performing accurate field surveys, proficiently operating various professional equipment and tools. My strong knowledge of surveying techniques, procedures, and principles has been honed over the course of my extensive career. I possess exceptional multitasking skills and have a significant ability to excel in team environments, making me an asset to any project. Moreover, I am well-versed in standard safety policies and procedures, ensuring a secure working environment at all times.

## OBJECTIVE

Desire to thrive in a stimulating work environment that pushes my boundaries, enabling me to actively contribute to the continuous progress and triumph of the organization. Aspire to secure a position that harnesses my valuable work experience within a burgeoning industry.

Sawat Motorway Project

## TASKS PERFORMED

### CONSULTANT SURVEYOR

- Responsible for Traversing, Precise Leveling, X-sections, and Topography
- Provided guidance to contracted survey parties to achieve project goals and oversaw their operations
- Monitored and reviewed the work performance and work products of contracted survey work in support of project development
- Served as the lead worker or project lead for survey-related work, including planning and prioritizing survey work
- Assisted in planning work schedules, planned steps, and accomplishment procedures
- Performed other job responsibilities as assigned
- Provided quality assurance and oversight of work performed by contractor's surveyors to ensure accuracy of surveys and data collected

### CONTRACTED SURVEYOR

- Conducted a wide range of surveys, encompassing Construction Layout, Topographic Surveys, Traversing, Precise Leveling, X-sections, and As-built surveys, as part of various engineering projects.
- Employed advanced and sophisticated equipment, including GPS systems and Total Stations, renowned for their sensitivity and precision, ensuring consistently accurate and efficient survey results.
- Played a crucial role in providing comprehensive construction layout services for diverse development projects, such as Tunnels, Bridges, Flyovers, Underpasses, Culverts, Retaining Walls, and Breast Walls designed for drainage purposes. These layouts served as essential blueprints for the successful execution of the developments.
- Leveraged cutting-edge robotic total station technology to enhance the accuracy and effectiveness of site surveys, significantly streamlining the data collection process and improving overall survey outcomes. This innovative approach contributed to increased productivity and reduced human error during fieldwork.

### Senior Surveyor

Feb 2019 – Jan 2020

#### Limak-ZKB (JV)

Client: National Highway Authority (NHA)

Hakla (M-1) To D.I Khan Motorway (China Pakistan Economic Corridor)
