Introduction

- Software Engineer with 3 years of experience specializing in Blockchain Solutions and full-stack development. Adept at creating seamless user experiences and driving technological advancements, including building a white-label SaaS platform now serving 2,000 customers. Proficient in Laravel, Vue.js, and Python, with a proven track record in responsive design and technical writing.

Experience

Invogue Solutions

Dec 2022 – present

Software Engineer

Islamabad, Pakistan

- As a Blockchain Developer Advocate, my focus is on creating open-source projects, writing tutorials, and engaging with developers in forums. I stay at the forefront of blockchain and Web3 technologies, help developers navigate these emerging fields, and foster a strong developer community.
- In my role as a full-stack developer, I played a key role in building a white-label SaaS platform for a lawn mowing company in the US. This platform now serves around 2,000 customers, offering a seamless, fluid, and responsive user interface that significantly enhances the user experience.
- Worked closely with cross-functional teams to enhance the platform's user interface and overall functionality. This involved revamping existing designs, implementing new features, and optimizing the UI for responsiveness and cross-browser compatibility. Leveraged Laravel for the back end and Tailwind, Vue.js, and Inertia.js for the front end, significantly improving the user experience across various SaaS platforms, including solutions for senior living facilities, animal hospitals, and property management.
- I single-handedly developed a mobile app and an admin dashboard for a Cafe, learning React.js/React Native and AWS Amplify along the way. The mobile app provided customers with a seamless browsing and ordering experience. At the same time, the admin dashboard enabled the cafe staff to manage orders, update the menu, and set Geo locations for home deliveries.

Ideofuzion

June 2022 – September 2022

Front End Developer Intern

Islamabad, Pakistan

- Learn React.js, Bootstrap, Styled-Components, TypeScript, and Git, and successfully implemented a high-performance landing page with a Google Lighthouse score of over 90.
- Contributed to ongoing projects by fixing bugs and adding new features, such as integrating charts for analytics and implementing custom animations.
- Self-studied Hyperledger Fabric and React Native. Attended Web3 workshops and engaged in discussions with the CEO on blockchain business ideas, earning recognition for creative contributions and dedication.

Kreativ-Ally

April 2021 – September 2021

Junior Web Developer

Remote

- Created seamless and engaging user experiences for clients, delivering creative solutions that exceeded their expectations.
- Successfully migrated websites from various platforms to Webflow, integrating third-party plugins to fulfill client needs and enhance functionality.
- Supervised junior developers in learning Webflow, and received monthly bonuses for exceptional performance and contributions.

Fiverr

April 2019 – Present

Web Developer | UI Designer

Remote

- Worked with clients from all across the world and maintained an overall 5-star rating with 20+ exceptional reviews.
- Designed and developed websites using Webflow, CSS, HTML, jQuery, and JavaScript to enhance functionality and user experience on web pages.
- Worked under the mentorship of a senior front-end developer and collaborated on revamping the existing website for a doctors' clinic, and developed landing pages for a marketing agency to establish their online presence.

Projects

Supply Chain Management Using Hyperledger Fabric | *React, React Native, Node* **September 2022 - July 2023**

- Developed the frontend interface using React.js and mobile app in React Native, ensuring a seamless user experience and responsive design across various devices and screen sizes. Collaborated with the project team to understand user requirements and translate them into wireframes and design mockups.
- Integrated data from the Hyperledger Fabric blockchain network to display relevant information to stakeholders, such as the origin and certification status of Halal meat products. Ensured the security and integrity of data exchanges between the frontend interface and the blockchain network.

Security Dashboard | *C++, Visual Studio Code*

May 2023 - present

- Developed the frontend interface of the dashboard using React.js, creating reusable components for efficient code maintenance and scalability. Utilized Ant Design framework to achieve a clean and modern design aesthetic, ensuring consistency across the application. Implemented live location tracking features, integrating with location-based APIs to display real-time data and updates.
- Ensured responsive design and cross-browser compatibility to provide a seamless experience on various devices and browsers.

Technical Skills

Languages/Frameworks: Laravel, Inertia.js, TailwindUI, Tailwind. Vue.js, React.js, React Native, Bootstrap, HTML/CSS, JavaScript, SQL, Typescript, Styled Components

Tools: VS Code, Herd, Hyperledger Fabric, Git, Figma, Canva, Docker, Webflow

Education

National University of Science and Technology (NUST) | **SEecs**

Bachelor of Science in Computer Science

Sep. 2012 – July 2016

Islamabad, Pakistan
